EXPERIENCES

NVIDIA NeMo Sep 2026 - Oct 2026
Research Scientist Intern

- Developed RL and evaluation infrastructure for NeMo Gym (merged PR, 2000+ LoC), and evaluated open-source models for data synthesis.
- Delivered 50k+ RL prompts for Nemotron training, improving performance on MathArena and boosting arXivMath accuracy from ∼43% to ∼55%.

ByteDance Seed May 2025 - Sep 2026
Research Scientist Intern, Top Seed Talent Program

- **Formal math research**: Co-led BFS-Prover-V2 (infrastructure, data and training ablations); designed agent harnesses and worked on agentic post-training for Seed-Prover 1.5.
- **Coding post-training**: Developed end-to-end Lean-SWE post-training pipelines (infrastructure, data and reward design) using GitHub-synthesized data for Seed 2.0, improved performance on internal autoformalization and formal theorem-proving benchmarks.
- **Evaluation**: Led the development of ResearchMath, used in 30k+ internal evaluation trails across Seed Evolving and Seed 2.5; developed Math-SimpleQA and Proof-PPL benchmarks for Seed 2.5 mid-training evaluation.
- **Reasoning post-training**: Conducted RL algorithm ablations for Seed 2.1; delivered 200k+ RL prompts for large-scale Seed Evolving training, improving ResearchMath scores from ∼16% to ∼54%.
- **Mid-training**: Developed data synthesis pipelines (Socratic dialogues, conjecture–resolution paper pairing) for Seed 2.5, consistently improving Math-SimpleQA accuracy and reducing Proof-PPL.

EDUCATION

Carnegie Mellon University Pittsburgh, PA Sep 2023 -
Ph.D. candidate in the ACO program, affiliated with ICARM and L3 Lab
Advisor: Prasad Tetali & Sean Welleck

Fudan University Shanghai, China Sep 2019 - Jun 2023
B.S. in Mathematics, Top-notch Talent Program in Mathematics
